Full Stack Developer with experience working on agile teams building scalable web applications. Applies strong analytical and communication skills to drive efficiency and cohesion in product development.

Professional Experience

CURV LABS | Toronto | 2017 - Current

Full Stack Developer

I work on the Applications team building full-stack applications for both mobile and the web. Highlights include launching a first-of-a-kind Biomechanical Assessment API, working with Sports Scientists to accurately measure biomechanical compensations, assisting with the design of an end-to-end platform for biomechanical assessments.

DEEPTREE | Toronto | 2016 - 2017

Founder, COO

I worked with the Deeptree team to build Cadence (highly scalable project management tool) and CadenceBot (a lean code review assistant for Slack). My role varied from day-to-day, from performing front-end development to securing funds for operational expenses through business planning and market research.

MIOVISION | Kitchener, ON | 2010 - 2016

Data Services Manager

I managed multiple aspects of the Data Services team, including: performance management, COGS reduction, and KPI tracking.

Education

Web Development Full Time
Brainstation, Toronto, Canada | 2017

Honors Chemistry,
Wilfrid Laurier University | 2010
